Boat canopy zippers

Zipper information

Tolerance

Dimension	Maximum tolerance
3cm-6 cm	+ - 10mm
6cm-12cm	+ - 15mm
12cm-99cm	+ - 2%
100cm-999cm	+ - 1%

Zipper strength

BS EN 16732:2015 Performance Requirements of Slide Fasteners According to End Use

The following table sets out the basic minimum requirements for zipper performance according to end use.

Annex		Performance Code					
		Unit	A	B	C	D	E
B	Strength of puller attachment (min.)	N	70	80	200	250	300
C	Strength of closed-end (min.)	N	35	60	80	100	140
D	Strength of top stop (min.)	N	50	70	90	110	130
E	Strength of open-end slide fastener box (min.)	N	40	70	90	120	150
F	Resistance to reciprocation: Minimum cycles without failure	Cycles	500	500	500	500	500
G	Lateral strength of slide fastener (min.)	N	150	200	250	370	470
H	Lateral strength of open-end attachment (min.)	N	50	70	90	120	160
I	Strength of slider locking device (min.)	N	10	15	25	40	60
